

Trends and Change - 10 years: Census 2001 – Census 2011

Compiled by Strategic Development Information and GIS Department, City of Cape Town
 1996, 2001 and 2011 Census data supplied by Statistics South Africa
 (Based on Census 2011 information available at the time of compilation, as released by Statistics South Africa)

[Population and Households](#), [Demographic Profile](#), [Economic Profile](#), [Household Services Profile](#)

Population Cape Town and Western Cape:

Three Census years – 1996, 2001, 2011 (5, 10 and 15 year trend)

Population	1996 Census	2001 Census	2011 Census
Western Cape	3 956 876	4 524 334	5 822 734
Cape Town	2 563 095	2 893 249	3 740 026

Cape Town Population and Households – 2001 Census and 2011 Census

Cape Town	2001	2011	Change 2001 to 2011	
			Number	%
Population	2 892 243	3 740 025	847 782	29.3%
Households	777 389	1 068 572	291 183	37.5%
Average Household Size	3.72	3.50		

In 2011 the population of Cape Town was 3 740 025, an increase of 29.3% since 2001, and the number of households was 1 068 572, an increase of 37.5% since 2001. The average household size has declined from 3.72 to 3.50 in the 10 years.

A household is defined as a group of persons who live together, and provide themselves jointly with food or other essentials for living, or a single person who lives alone (Statistics South Africa)

The population and household numbers in the table above are to be used and quoted as the official numbers for Cape Town for 2011.

Cape Town Population Group – 2001 Census and 2011 Census: change

Cape Town Population Group	2001		1996-2001 5 years % change	2011		2001 -2011 10 years % change	1996-2011 15 years % change
	Number	%		Number	%		
Black African	916 584	31.7%	42.3%	1 444 939	38.6%	57.6%	124.3%
Coloured	1 392 594	48.1%	12.3%	1 585 286	42.4%	13.8%	27.9%
Asian	41 516	1.4%	9.6%	51 786	1.4%	24.7%	36.7%
White	542 555	18.8%	-0.2%	585 831	15.7%	8.0%	7.8%
Other	0*	0.0%		72 184	1.9%		-26.1%
Total	2 893 249	100.0%	12.9%	3 740 026	100.0%	29.3%	45.9%

In the period 2001 – 2011 (10 years):

- The population of Cape Town has increased by 29%
- The composition of the population has changed. For example, the Black African population increased by 58%, the Coloured population by 14% and the Asian population by 25 % (from a low base). The White population group increased by 8%.

In period 1996 – 2011 (15 years):

- The population of Cape Town has increased by 46%
- The composition of the population has changed. For example, the Black African population increased by 124%, with the Coloured population increasing by 28%. The Asian population increased by 37% (from a low base.) The White population group increased by 7.8%, a slight decrease from the 10 year trend.

Notes:

1. There are small variations in the total population and the number of households in the profile tables which follow. These occur as Statistics South Africa had to calculate the true population to correct omissions and double counts in the enumeration process. These variations are not significant.
2. The category "other" was included in some questions in the 2011 Census. The 2001 Census did not have an "other" category for some questions hence information for "other" is only indicated for some variables in 2001.

Cape Town Households and Population – 2001 Census and 2011 Census: change

Three Census years – 1996, 2001, 2011 (5, 10 and 15 year trend)

Cape Town Population Group	Households			Population		
	1996 to 2001 % change 5 years	2001 to 2011 % change 10 years	1996 to 2011 % change 15 years	1996 to 2001 % change 5 years	2001 to 2011 % change 10 years	1996 to 2011 % change 15 years
Black African	49.5%	77.1%	164.8%	42.3%	57.6%	124.3%
Coloured	19.4%	15.5%	37.9%	12.3%	13.8%	27.9%
Asian	15.1%	41.7%	63.2%	9.6%	24.7%	36.7%
White	5.5%	13.2%	19.4%	-0.2%	8.0%	7.8%
Total	19.0%	37.5%	63.6%	12.9%	29.3%	45.9%

The population and number of households in Cape Town have changed at different rates, with the overall trend being that the number of households has increased at a higher rate than the population has increased as outlined above and below.

In the period 2001 – 2011 (10 years):

- The number of households in Cape Town increased 38% (the population increased 29%)
- The number of Black African households increased 77% (the population increased 58%)
- The number of Coloured households increased 16% (the population increased 14%)

In the period 1996 – 2011 (15 years):

- The number of households in Cape Town increased 64% (the population increased 46%)
- The number of Black African households increased 165% (the population increased 124%)
- The number of Coloured households increased 38% (the Population increased 28%)

Note: 5 years = % change Census 1996 to 2001 10 years = % change Census 2001 to 2011 15 years = % change Census 1996 to 2011

Cape Town Households Size – 2001 Census and 2011 Census: change

Three Census years – 1996, 2001, 2011 (5, 10 and 15 year trend)

Cape Town Average Household Size (Number of people per household)	Black African	Coloured	Asian	White	Total Cape Town
Census 1996	3.83	4.77	4.33	2.79	3.92
Census 2001	3.65	4.49	4.12	2.64	3.72
Census 2011	3.25	4.42	3.63	2.52	3.50

The average household size in Cape Town has changed over the past 15 years, with the overall trend being that the average household size has decreased from 3.92 persons per household in 1996 to 3.50 persons per household in 2011.

In the period 2001 – 2011 (10 years):

- The average household size in Cape Town decreased from 3.72 persons to 3.50 persons per household.
- In 2011 the Coloured population group had the highest average household size of 4.42 slightly down from the average 4.49 in 2001.
- In 2011, the Black African population group has the second lowest average household size of 3.25, a reduction from the 3.65 average figure in 2001.
- In 2011, 43.8 % of all Cape Town households are one or two person households, up from 36.8% in 2001
- In 2011, 33% of all Cape Town households are three or four person households, decreased from 35% in 2001.

* Other category not included in 2001 Census

In the period 2001 – 2011 (10 years):

- The population gender distribution of males and females has largely remained the same, with there being more females than males in Cape Town.
- In 2011, the percentage of females of the total population declined slightly from 52% in 2001 to 51% in 2010. The number of males increased slightly as a percentage of the total from 48% in 2001 to close to 49% in 2011.
- In 2011, in a similar pattern to the population growth in Cape Town, the percentage of Black African males and females increased as a percentage of the total population: Black African males from 15.5% in 2001 to 19.3% in 2010; Black African females from 16.2% in 2001 to 19.3% in 2011.
- Coloured females, who made up the highest percentage of the total population of Cape Town in 2001 at 25.2%, remained the highest percentage of the population of Cape Town in 2011, however at the lower percentage of 22%.

Cape Town Age Pyramid 2001

Cape Town Age Pyramid 2011

In the period 2001 – 2011 (10 years):

- The age distribution of the population of Cape Town has changed and aged in the past 10 years, most noticeably reflected in the age pyramids above.
- The population of Cape Town in terms of age groups remains predominantly in the 25 – 64 years group (51% in 2011, 48% in 2001).
- In 2011, there are smaller cohorts in the 5 – 24 age groups than in 2001. For example, in 2011, 18% are in the 15 – 24 year age group, a decrease since 2001 (20%); 15 % of the population is aged 5 – 14 years (in 2001 was 18%); 10% 4 years or younger (in 2001 was 9%).
- The population is also starting to age, with increasing percentages of the population in the 65 years and older category. The White population group is reflecting this change most over the past 10 years, with 15% of the population in 2011 in this age category (in 2001 was 13%), close to three times the percentage compared to other population groups.
- The median age in Cape Town is 28 years.
- In terms of the age cohorts and the highest percentage by population group, the 2011 Census has retained a similar pattern to the 2001 age distribution for Cape Town. In 2011 in the 0 to 4 years category 12% are Black Africans; 5 – 14 year category 17% are Coloureds; 15 to 24 years old – 21% are Black African; 25 – 64 year category 58% are White; and 65 years and older 15% are White.
- The young Black African and Coloured age cohorts and older White and Asian age cohorts in 2011 have implications for service delivery needs, planning and implementation.

In the period 2001 – 2011 (10 years):

- The ten year trend for adult education of those age 20 years and older is positive in that the percentage of those with no schooling has declined from 4.2 % in 2001 to 1.8% in 2011.
- The percentage of adults who have Grade 12 has also increased from 25% in 2001 to 30% in 2011.
- In 2011 16% of adults in Cape Town have an education level higher than Grade 12, which has increased from 13% in 2001.
- Whilst there have been increases in the percentages of Black African and Coloured population of adults who have Grade 12: Black African increased from 20% in 2001 to 30% in 2011; and Coloured adults increased from 21% in 2001 to 27% in 2011, these figures are relatively low compared to the Asian population group of 35% with Grade 12 and White 36% in 2011.
- To note with regard to the implications for skills development is in 2011, the relatively low percentage of Black Africans and Coloureds with an education level higher than Grade 12 at 9% (up from 6% in 2001), compared to Asians 35 % in 2011 (up from 22% in 2001) and Whites 45% in 2011 (up from 36% in 2001).

Definitions:

Unemployment rate is the proportion of the labour force that is unemployed.

The **labour absorption rate** is the proportion of working age (15 to 64 years) population that is employed.

The **labour force participation rate** is the proportion of the working age population that is either employed or unemployed.

In the period 2001 – 2011 (10 years):

- In 2011, 76% of the labour force (aged 15 to 64) is employed, 24% of the labour force (aged 15 – 64) is unemployed. This has increased in 2011 from 2001 where 71% of the labour force in Cape Town was employed and 29% unemployed.
- The unemployment rate of the labour force in Cape Town has declined from 29% in 2001 to 24% in 2011.
- The labour absorption rate of those of working age in Cape Town who are employed has also increased marginally from 47% in 2001 to 50% in 2011.

In the period 2001 – 2011 (10 years):

- In 2011, 47% of households in Cape Town had a monthly income of R3 200 or less, which has declined from the 2001 percentage, of 56% of households in Cape Town had a monthly income of R3 200 or less.
- 14% of households in Cape Town had a monthly income of R25 601 or more in 2011, with 4% having a monthly income of R25 601 or more in 2001.
- The percentage of households with no monthly income has increased slightly from 13% in 2001 to 14% in 2011.
- In 2001, 87% of Black African households had a monthly income of R3 200 or less a month, which has declined to 69% in 2011
- 54% of Coloured households in Cape Town had a monthly income of R3 200 or less a month in 2001 which has declined to 41% in 2011.
- The above trends indicate that there has been improvement in levels of households' monthly income; however the levels of household income in Cape Town are relatively low.

In the period 2001 – 2011 (10 years):

- The percentage of households in Cape Town in formal, informal and other types of dwellings has largely remained the same.
- In 2011, 78 % of households in Cape Town live in formal dwellings (similar to 2001 79%); 14% of households (144 000 households) live in informal dwellings in informal settlements (15 % in 2001).
- However there has been a large growth in the number of households living in informal dwellings in backyards, with 7% of households (75 000 households) in 2011, an increase of more than 3% from 4.3% in 2001.
- In 2011, 43% of Black African households in Cape Town were living in informal settlements and informal dwellings in backyards. This is a decrease from 2001 where the percentage was 52% of Black African households.
- Both in 2001 and 2011, 87% of households living in either informal settlements or informal dwellings in backyards are Black African.
- In 2011, 25 613 (7%) Coloured households in Cape Town are living in informal settlements and informal dwellings in backyards, an increase from 2001 with 17 083 (5.5%) Coloured households

In the period 2001 – 2011 (10 years):

- In 2011, 33% of households in Cape Town live in dwellings that are owned and fully paid off (note: this includes “Breaking New Ground” BNG (subsidy) houses); 30% of households live in dwellings that are rented and 21% of households live in dwellings that are owned and not yet paid off.
- These percentages are largely similar to those in 2001, however there has been an increase in 2011 in households living in owned and fully paid off dwellings (was 31% of households in 2001) and rented dwellings (was 25% of households in 2001).
- In 2011, 35% of Black African households live in owned and fully paid off dwellings, an increase from 2001 where the percentage was 30%.

- In 2011, 33% of Coloured households live in owned and fully paid off dwellings, an increase from 29% in 2001.
- The 2011 tenure percentages, combined with the type of dwellings and household sizes suggests that there human settlement needs are changing and there is a need to continue to address these and explore a range of alternatives.
